The New Food Technology Kitchen

Firstly, I would like to introduce myself...

I am *Mr Josephs*, teacher of Food Technology, Hospitality and Technology Mandatory. I've been teaching Food Technology and Hospitality for 12 years, and a chef for over 20 years previously. I have really enjoyed my start at Mater Maria, with a great culture of the school being one of excellent positivity

Well what a start to a school..... After opening the new kitchen in week 6, then closing in week 8 due unforeseen circumstances. The sound of knives chopping, frypans sizzling and saucepans boiling, and particularly the excitement of students are all happening again, and proud to mention all Year 9, 10 and 11 Food Technology classes are cooking up a storm.

As it is my first year here, I must stress how impressed I am with the level of application in the kitchen from the students. It has been great to see their enthusiasm when cooking. The Mater Maria students are really excelling in all practical aspects of cooking.

Moroccan Chicken

Year 11 Food Technology

Year 11 Food Technology students have been vigorously working hard in both the kitchen and with their academia. Cooking dishes such as; Lemon Myrtle Pasta, Moroccan Chicken, Donuts, Apple Cheesecake, Calzone, Sushi and Muesli Bars. The students have completed some fantastic work, whilst learning lots being very supportive of each other.

Year 10 Food Technology

Year 10 has really embraced the new kitchen, making Tim Tams from scratch as per the photo, Chicken Tortilla's, Beef Kebabs with Cous Cous, Burgers, Risotto and Weet-Bix Slice.

As the year 10 Food technology settles in to the first semester they too have shown much ability in the kitchen. The realisation that Food Technology is about using different intelligences, such as academia, creativity, organisation and teamwork, year 10 are gathering momentum in their abilities to use the new with pride.

Year 9 Food Technology

After a slow start and their enthusiasm starting to lag, their over enthusiasm first lesson in the new kitchen was rather exciting to watch. Both classes embracing the opportunity to work in the new kitchen and to show off their skills. Also, coming to realize that just because food may be healthy does not mean it tastes bad. Making homemade muesli from scratch, pancakes with fruit compote, Kangaroo Burgers, ANZAC cookies by Zoom, Apple crumble and Spaghetti Bolgnese from scratch including the pasta.
