

MATER MARIA INTRODUCES VIRTUAL REALITY LEARNING

VRCreate program was introduced as a pilot project in term 4 whereby 23 students from a Year 8 class got to experience and work with Virtual Reality equipment and software.

About the project: TAS Elective Subject

Students from years 8 onwards are faced with making decisions regarding future subject choices and career possibilities.

The objective of this project was to create a presentation of the TAS elective subjects on offer at Mater Maria College, using the new emerging technology virtual reality.

The purpose: to encourage and engage students in making decisions on subject choice, giving them a more detail explanation and immersive view of each TAS subject.

What students learnt

- Students got hands on experience with virtual reality emerging technology software and VR headsets.
- They learnt valuable skills in multimedia using 360°images and content such as photo's, videos and 3D models.
- Students gained practical experience in various levels of software design and the VR Software platform.

A full case study will be available shortly on the local company website www.edgedvr.com.au
