

WALK IN NEW LIFE

MATER MARIA
CATHOLIC COLLEGE

YEAR 7 SCIENCE EXCURSION

Year 7 Science have been studying ecosystems and wetlands throughout Week 7 undertook a field study at Irrawong Falls. Students completed various scientific tests listed below to assess the water quality of the creek.

- PH Levels
- Turbidity
- Phosphates
- Temperature
- Salinity

The results have shown that the creek's water quality is excellent, within the parameters of the test. The students developed an appreciation of the natural environment and an understanding scientific technique to explore water quality.
